2.Functions

Screen

Note: the "CH.0" on the light serves as a back-up channel and can only be paired with "CH.88" on the remote.

3. Lighting Methods

Insert the handle into the light through the screw hole and turn it clockwise until it is tightened.

Then you can hold the light for photography shooting.

Connect the base mount to the light by rotating the screw in as instructed in the picture above.

Attach the base mount to your camera's hotshoe. Next, turn the knob clockwise to keep it secured.

4. Control the LED light with remote trigger

Demo: control a single light

When the light is on, quick press the "CH." button until the icon "CH.0" appears flashing on the display.

Rotate the left or right knob on the light to switch to "CH.1". Then quick press the "CH." button to exit the channel mode.

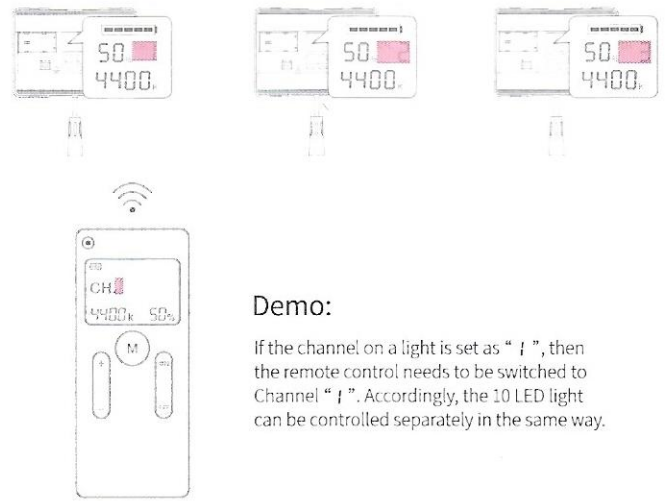

Turn on the remote trigger and quick press the "M" button until the symbol "CH." shows blinking on the remote screen.

Press the "+" or "-" button on the remote to switch to CH.1 and quick press the "M" button to exit the channel mode. Then, the single LED light can be controlled by the remote.

Controlling multiple 2.4G LED light

Demo:

If the channel on a light is set as "1", then the remote control needs to be switched to Channel "1". Accordingly, the 10 LED light can be controlled separately in the same way.

⚠ When the trigger is on and is set in the same channel as your light, pressing the trigger's "Power Switch" button can switch the light into standby mode.

Controlling all 2.4G LED light

Demo:

If the channel on different lights is set as any number from "0" to "10", then the remote control needs to switch to Channel "88".

5. Safety Notes

⚠ Please put the cables away in case of tripping hazard.

⚠ Please do not use alcohol or liquids to clean the LED light.

6. Product Parameters

Model	P600 2.4G
LED quantity	600
CRI	>96
Lumen (Diffuser included)	0.5M 5600LUX 1M 1700LUX
Power	38W
Battery Voltage	7.2V
Input Voltage	DC IN 12-15V
Color Temperature	3200-5600K (±100)
Size	265*187*42MM

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC's RF radiation exposure limits set forth for an uncontrolled environment. The antenna(s) used for this transmitter must be installed and operated to provide a separation distance of at least 20 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter. Installers must ensure that 20cm separation distance will be maintained between the device (excluding its handset) and users.
